

## DESCRIPTION

Our timber sash window is designed to maintain the tradition look of a period property but have the added benefit of modern design technologies, as a result we are able to offer a window with traditional elegance, great thermal performance and enhanced security features.

All of our systems can be manufactured to meet the specification requirements of any project, from single glazed and slimline 12mm double glazed units, 24mm standard units all the way up to our 36mm triple glazed units offering you maximum energy efficiency and sound reduction.

To compliment the design and manufacture of our beautiful sash windows we also have a range of profile finish including ovolo and lambs tongue. Our windows can be finished in range of stain options as well as any Ral colour including heritage colours such as the Farrow & Ball and Little Greene range. Dual finish is also an added option.

Description: SASH130 Traditional
